Work experience

2026 · GOTHENBURG, SWEDEN

Fullstack Developer, LeadCaller (Communication One i Göteborg AB)

- Built features across a live product, from frontend and backend to AWS infrastructure.
- Built a real-time voice agent and a chat assistant, using a RAG pipeline to keep answers accurate.
- Integrated Stripe payments and built an automation engine for email and SMS.
- Built and ran a serverless backend on AWS, working with both NoSQL and SQL databases.
- Onboarded customers, owned QA, and handled production issues when they came up.
- Worked day to day in TypeScript, React/Remix, and Node, with AI tools as a natural part of the workflow.

2025 · GOTHENBURG, SWEDEN

Internship, AI Sweden

- Developed a modular Python application with dynamic backend switching between Neo4j and SQL, enabling real-time summarization using Gemini AI.
- Contributed to an AI-driven system for managing project metadata (approach, fulfillment, expected outcomes) supporting structured analysis.
- Built a data pipeline to capture, store, and display project information in a user-friendly GUI.

2024 · GOTHENBURG, SWEDEN

Internship, Algeineer

- Developed with Manim to make teaching more visual and easier to follow.
- Built a foundation in Git and agile ways of working in a real-world setting.

Professional experience

Many years in hospitality, including running my own bar and leadership roles, gave me a solid foundation: resilience under pressure, social ease, and a genuine enjoyment of working with people. I have led and trained staff in stress management and customer service, and helped develop businesses for the better.

Skills

- TypeScript
- Python
- React / Remix
- Node.js
- AWS (SST / CDK)
- SQL / PostgreSQL
- RAG / LLM
- Claude / OpenAI
- C#
- Git

Profile

Fullstack developer working across the whole stack, from frontend and backend to infrastructure. I have built AI features in production, including voice agents, RAG, and LLM integration. I like learning new technologies and working closely with a team that wants to solve the challenges together.

Education

2023–2025 · GOTHENBURG

Object-Oriented Programming with a focus on AI

Higher Vocational Education diploma, 400 HVE credits · NBI Handelsakademin
